Volume 25 (1990)

Barnard, G.A., Comment (3) 437–439
Berger, J.O., Robust Bayesian analysis: Sensitivity to the prior (3) 303–328
Brillinger, D.R., K.H. Downing and R.M. Glaeser, Some statistical aspects of low-dose electron imaging of crystals (3) 235–259
Chan, L.-Y., An example of construction of asymptotic D-optimal design which converges on an infinite set of points (1) 29– 34
Chang, I.S. and C.A. Hsiung, Finite sample optimality of maximum partial likelihood estimation in Cox's model for counting processes (1) 35– 42
Dempster, A.P., Causality and statistics (3) 261–278
Downing, K.H., *see* D.R. Brillinger (3) 235–259
Glaeser, R.M., *see* D.R. Brillinger (3) 235–259
Good, I.J., Reply to the Comment by G.A. Barnard (3) 439–440
Good, I.J., Speculations concerning the future of statistics (3) 441–466
Haiman, G. and M.L. Puri, A strong invariance principle concerning the *J*-upper order statistics for stationary *m*-dependent sequences (1) 43– 51
Harel, M. and M.L. Puri, Weak convergence of the serial linear rank statistic with unbounded scores and regression constants under mixing conditions (2) 163–186
Hsiung, C.A., *see* I.S. Chang (1) 35– 42
Hultquist, R.A., *see* L.J. Suchower (1) 105–108
Kadane, J.B. and T. Seidenfeld, Randomization in a Bayesian perspective (3) 329–345
Kendall, D.G., Random Delaunay simplexes in $\mathbb{R}^m$ (3) 225–234
Khuri, A.I., Multiresponse rotatability (1) 1– 6
Klaassen, C.A.J., Random and fixed replacement sampling plans (2) 153–161
Leite, J.G., *see* S. Zacks (3) 363–380
Levi, I., Compromising Bayesianism: A plea for indeterminacy (3) 347–362
Lim, Y.B., D-optimal design for cubic polynomial regression on the *q*-simplex (2) 141–152
Lindley, D.V., Good's work in probability, statistics and the philosophy of science (3) 211–223
Mason, D.M. and G.R. Shorack, Necessary and sufficient conditions for asymptotic normality of trimmed *L*-statistics (2) 111–139
Maymin, Z., For what subsets of parameters is the least squares estimator minimax? (2) 199–204
Michie, D., Personal models of rationality (3) 381–399
Myers, R.H., *see* D.M. Wardrop (1) 7– 28
Nieuwenhuis, G. and F. Ruymgaart, Some stochastic inequalities and asymptotic normality of serial rank statistics in general linear processes (1) 53– 79
Pereira, C.A. de B., *see* S. Zacks (3) 363–380
Puri, M.L., *see* G. Haiman (1) 43– 51
Puri, M.L., *see* M. Harel (2) 163–186
Roussas, G.G., Asymptotic normality of the kernel estimate under dependence conditions: Application to hazard rate (1) 81–104
Rubin, D.B., Formal modes of statistical inference for causal effects (3) 279–292
Ruymgaart, F., *see* G. Nieuwenhuis (1) 53– 79
